

Indigo Collective

We build the systems that run your business.

Indigo Collective

Indigo Collective is an AI infrastructure firm. We embed inside local businesses, identify where they lose time and money, and build systems that fix it.

- Based in the Greater Toronto Area
- Focused exclusively on local service businesses
- Every system built to run independently

We are not an agency. We do not run your ads. We build the infrastructure that replaces manual work — permanently.

THE PROBLEM

The Bottleneck Is Not Your Team

Walk through any service business and the patterns are identical. The front desk texts customers from a personal phone. The owner checks five apps to understand their own pipeline. Leads go cold because no one followed up within the hour. Reviews accumulate unanswered. Every month, the same manual work repeats.

THE COST

Response time: 78% of customers buy from whoever responds first.

Follow-up: 44% of businesses give up after one attempt.

Reputation: Unanswered reviews reduce call volume by 35%.

These are not people problems. They are infrastructure problems.

How We Work

01	Discovery We sit inside your business. We watch how work actually happens — who does what, how long it takes, where things break. This is not a questionnaire. It is a diagnostic. Output: A scored assessment across 12 operational dimensions, with prioritized automation opportunities and estimated impact.	1-2 WEEKS
02	Build We design and deploy custom systems directly inside your existing tools. No platform migrations. No learning curves. Everything runs where your team already works. Output: Live automation running in your business — tested, documented, and production-ready.	4-8 WEEKS
03	Adoption A system nobody uses is expensive decoration. We train your team role by role, embed the workflows into daily operations, and track adoption until it holds. Output: A team that runs independently, with measurable time savings tracked from week one.	ONGOING

Systems, Not Services

Every engagement is scoped to your business. Below is a representative sample of what we deploy.

Automated Lead Response

New inquiry to qualified response within 60 seconds. Text, email, or call. 24/7, including weekends and holidays.

Replaces: Receptionist — \$2,800-4,300/mo

AI Appointment Setting

Conversational AI that books meetings from inbound messages. Handles objections, follows up, confirms. No human in the loop.

Replaces: SDR/Setter — \$3,500-5,000/mo

Review Management Engine

Automated review requests after every job. Smart gating prevents negative public reviews. AI-drafted responses to every review.

Replaces: Reputation agency — \$1,500-3,500/mo

Follow-Up Sequencing

Multi-channel drip campaigns that fire automatically. Text, email, voicemail drop. Stops when they reply.

Replaces: Sales rep follow-up — \$4,000-5,500/mo

Competitive Intelligence

Real-time monitoring of competitor reviews, pricing, and ad presence. Delivered as a weekly briefing with actionable insights.

Replaces: Market research — \$2,000-4,000/mo

Custom CRM and Pipeline

White-labeled pipeline management built for your workflow. Every lead, every stage, every metric — visible in one place.

Replaces: Off-the-shelf CRM + admin — \$1,200-3,000/mo

PORTFOLIO

Built and Deployed

A selection of systems currently in production.

AUTOMOTIVE E-COMMERCE

Full e-commerce platform with AI-powered tire finder and real-time inventory

AUTOMOTIVE E-COMMERCE

Product catalog with specifications, ratings, and automated pricing engine

CRM PLATFORM

White-labeled client portal with pipeline management and reporting

MOBILE RESPONSIVE

Full mobile optimization

CRM PLATFORM

Kanban pipeline and analytics

CASE STUDY

Automotive E-Commerce Platform

Vaughan, Ontario

THE PROBLEM

New tire marketplace with no digital presence, no inventory system, and no way to convert online traffic to sales. Competing against established retailers with mature e-commerce operations and years of review history.

WHAT WE BUILT

- Full e-commerce platform with real-time inventory sync
- AI-powered tire finder — search by vehicle, size, or brand
- Automated pricing engine with wholesale cost, margin targets, and competitor benchmarking
- Mobile-responsive storefront with Google Reviews integration
- Branded product cards with specifications, ratings, and fitment data

THE RESULT

TIME TO LAUNCH

Concept to production in under 6 weeks

CATALOG

Full inventory live with automated pricing

COMPETITIVE POSITION

Professional e-commerce experience on par with established retailers

OPERATIONS

Zero manual inventory or pricing updates required

Where We Work

Field Service and Trades

HVAC, Plumbing, Roofing
Electrical, General Contracting
Landscaping, Cleaning
Moving, Pest Control
Automotive

Professional and Retail

Dental, Medical, Optical
Legal, Insurance, Financial
Food and Beverage
Barber, Salon, Spa
Retail and E-Commerce

Every industry has the same core inefficiency. The workflows are different. The infrastructure gap is identical.

What Changes

Lead Response	From hours to under 60 seconds
Follow-Up Completion	From 1 attempt to full 5-touch sequence, every lead
Review Generation	3x-5x increase in monthly Google reviews
Operational Time Recaptured	15-25 hours per week returned to revenue-generating work
Visibility	Every lead, every stage, every metric — in one dashboard

NEXT STEP

Start With a Conversation

Every engagement begins with a complimentary operational assessment. In 60 minutes, we will map where your business is losing time and money, identify the highest-impact opportunities, and outline what a custom build would look like.
