WHO WE ARE

Indigo Collective

We embed inside your business, understand how your operations actually work, identify the highest-value opportunities for AI, and build the systems that deliver results.

WHAT WE ARE

- ◆ AI infrastructure company for growing businesses
- ◆ End-to-end delivery: assess, build, deploy, train
- ◆ We build inside your tools, not alongside them

WHAT WE BELIEVE

- ◆ Every business has processes AI can do better, faster, and cheaper
- ◆ AI built without workflow understanding fails
- ◆ Adoption matters as much as the build

OUR APPROACH

- ◆ Assess before recommending anything
- ◆ Build bespoke systems, not templates
- ◆ Train until it is habit, then automate until it is invisible

20+

SYSTEMS DEPLOYED

15+

INDUSTRIES SERVED

100%

CLIENT RETENTION

THE PROBLEM

Your Team Is Busy. *But Busy Doing What?*

Walk into any business and you find the same patterns:

- ◆ Staff responding to leads from personal phones
- ◆ Owners checking 5-6 apps to see what is happening in their business
- ◆ Leads going cold because nobody followed up within 5 minutes
- ◆ Reviews piling up unanswered while competitors dominate Google
- ◆ The same manual tasks repeated daily that a system could handle in seconds

THE HIDDEN COST

SPEED

Competitors respond faster, close faster, grow faster

MONEY

You pay full salaries for work AI does in seconds

QUALITY

Manual processes create errors. Errors create more work.

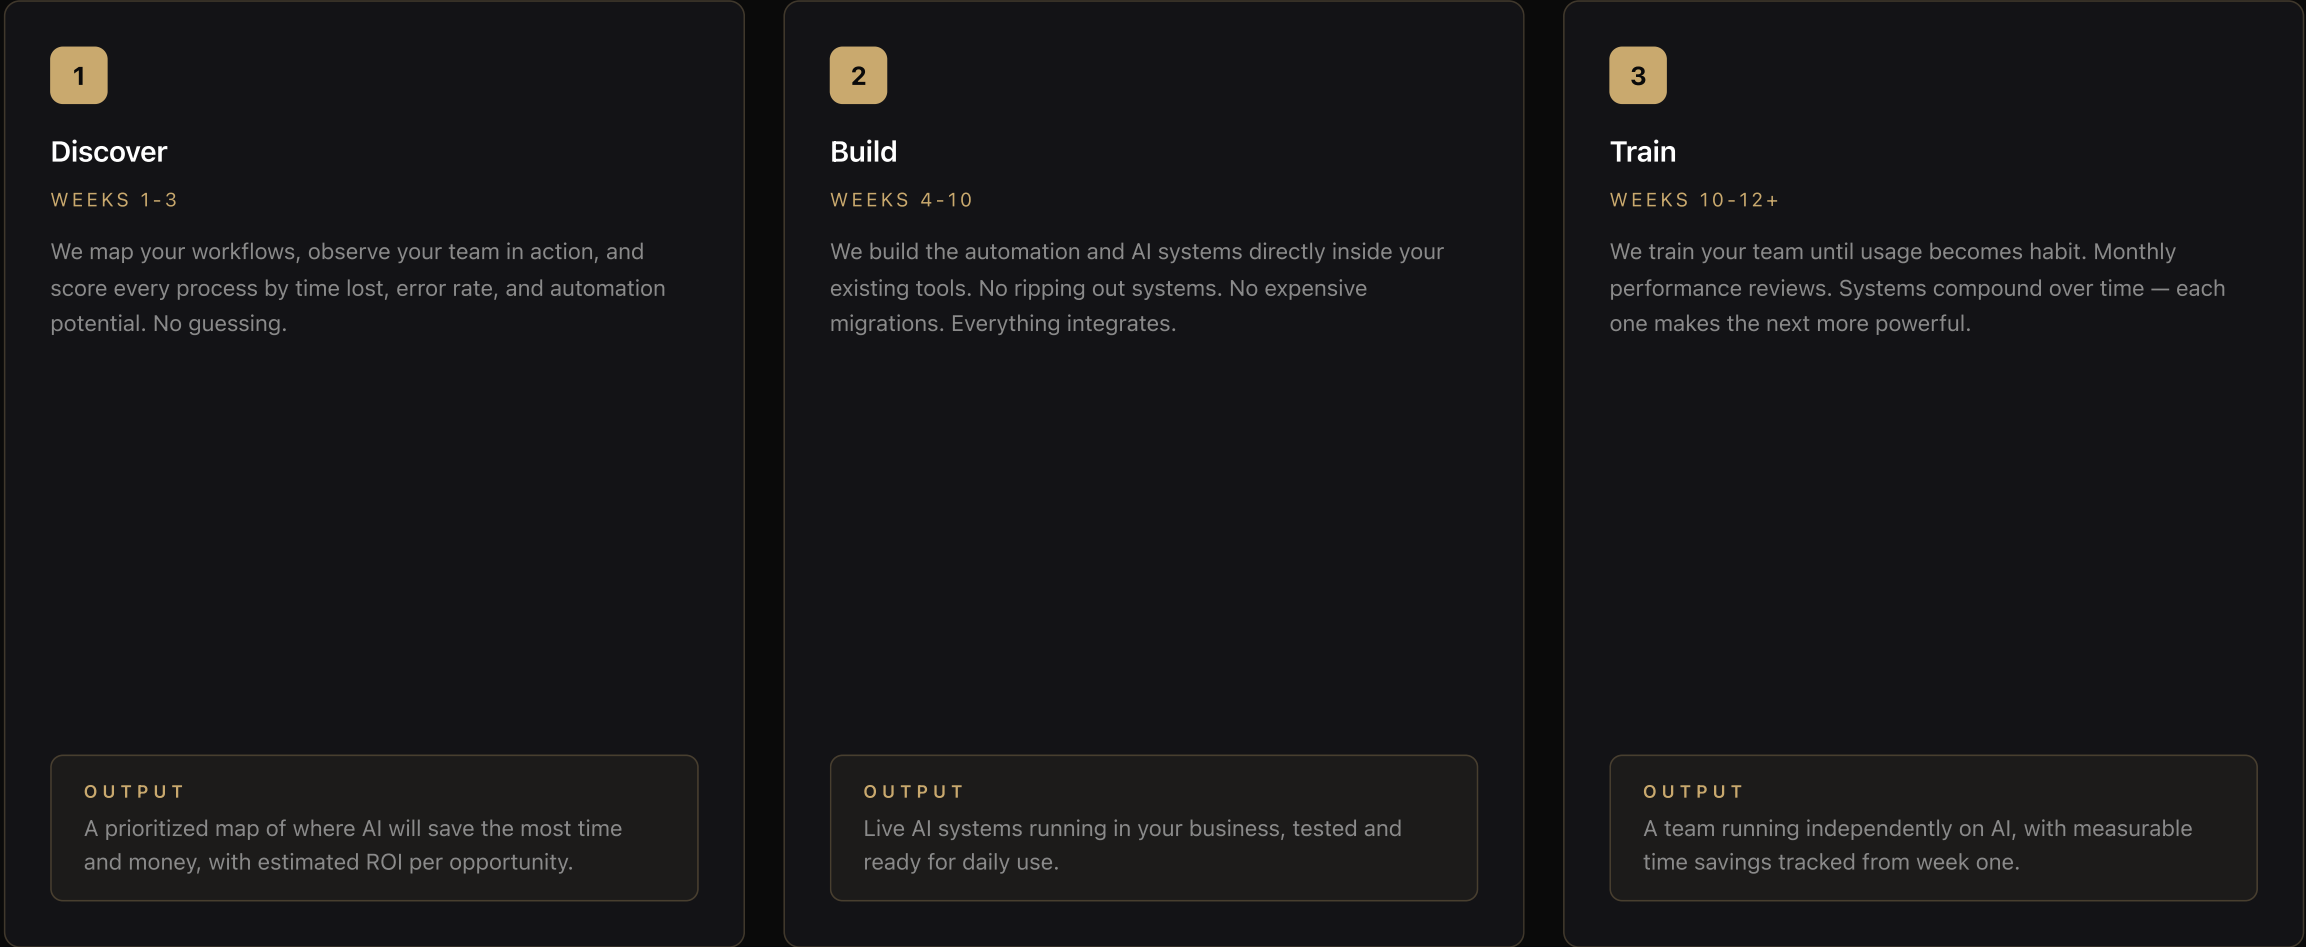

SCALE

You cannot grow without adding more headcount

"It is not a people problem. It is a systems problem."

Three Steps.

Every engagement follows this sequence.

The Assessment: Finding What Is Actually Broken

Most businesses try to guess which processes to automate. That is why most AI projects fail. **We do not guess. We look.**

Real Example

12+

Automation Opportunities Identified

Local service business — 15 employees, 3 locations. Assessment revealed lead response time averaging 4+ hours. Top competitors responding in under 60 seconds.

Estimated Annual Impact

\$150K+

Our Assessment Method:

- 1

Stakeholder Interviews

We speak to leadership to understand strategic priorities
- 2

Process Mapping

We map every repeatable workflow across your operations
- 3

Time and Frequency Audit

We quantify how long each task takes and how often it repeats
- 4

Friction Scoring

We score every process by time lost, error rate, and automation potential
- 5

ROI Modeling

We estimate the financial value of fixing each opportunity

WHAT COMES OUT OF IT

Ranked automation opportunities	Estimated time savings per function
Annual cost savings / revenue impact	Phased roadmap with quick wins

The Build: AI That Works Inside Your Business

We build AI for specific, identified problems with clear expected outcomes.

Lead Generation and CRM

Automated lead capture, qualification, and pipeline management across all channels.

Customer Communication

AI-powered messaging, follow-up sequences, and appointment booking that runs 24/7.

Review and Reputation

Automated review requests, response management, and competitive monitoring.

Sales Automation

Quote generation, follow-up cadences, AI setters that book appointments while you sleep.

Operations and Reporting

Dashboards that update themselves, health monitoring, automated reporting on schedule.

Web and Digital Presence

Custom websites, marketplace platforms, SEO optimization — your digital storefront done right.

Works inside your existing tools

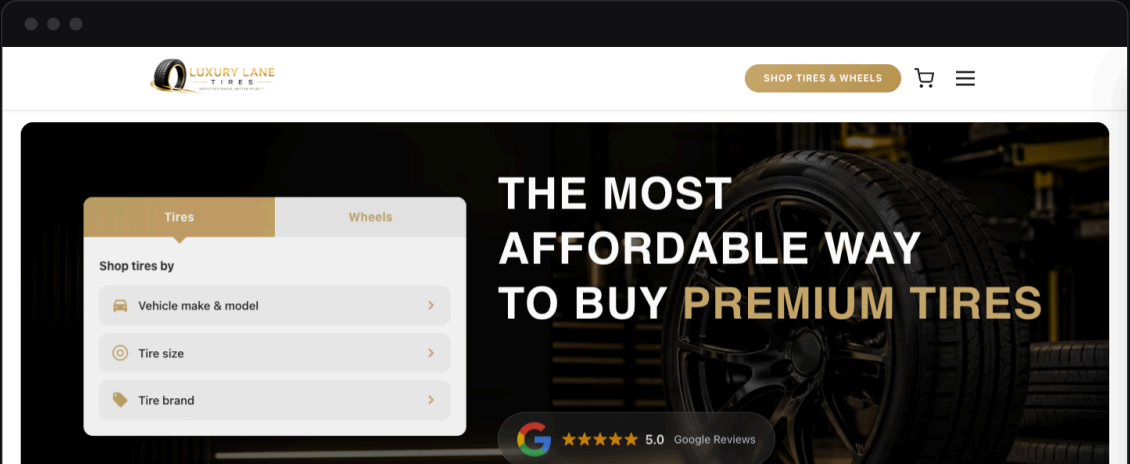

Human review built in at every step

Full audit trail — see what AI did and why

Designed for independence — your team runs it without us

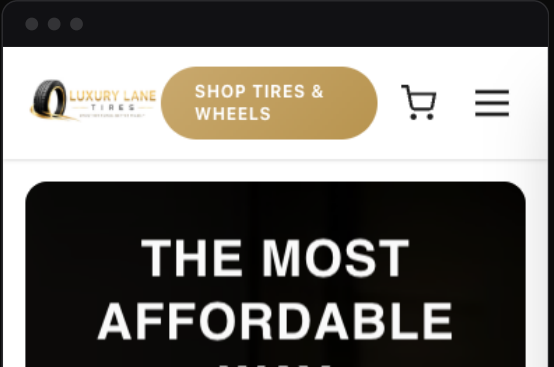

Systems We Have Built and Deployed

Real systems running in production for real businesses.

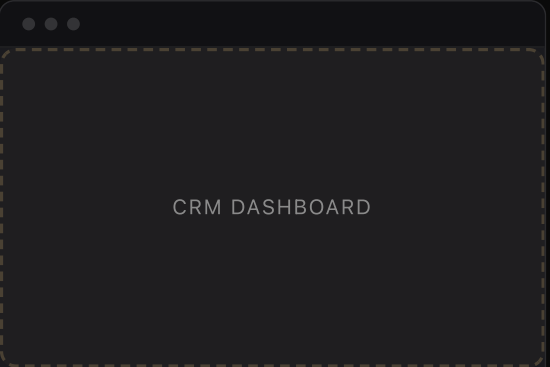

E-Commerce Marketplace Platform

Full tire and wheel marketplace with AI-powered product search, automated pricing engine, brand catalog, and integrated checkout. Desktop and mobile optimized.

Mobile-First Design

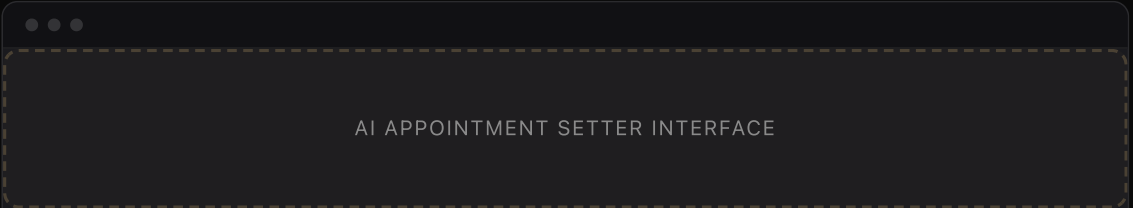

Responsive across all devices.

CRM Dashboard

Sales CRM and Pipeline

Lead scoring, follow-ups, pipeline visibility.

AI Appointment Setter

Intelligent conversation flows that qualify leads, handle objections, and book appointments automatically.

RESULTS

What Our Systems Deliver

Measurable impact from real engagements.

E-COMMERCE BUILD

Tire Marketplace Platform

0 to Live in 4 Weeks

Full platform built and deployed from scratch

Complete e-commerce marketplace with AI-powered product search, competitive pricing engine, automated inventory management, brand catalog, and mobile-optimized checkout.

LOCAL RETAILER

Review Automation

23 to 89 Google Reviews

In 6 weeks. Zero messages sent manually by owner.

Automated post-purchase review request sequences turned a quiet listing into a neighborhood destination. System runs entirely on its own.

SERVICE COMPANY

Cross-Referral Network

2 Texts to Confirm a \$300 Booking

Automated handoff between partner businesses

Post-service agent texts: "Need cleaning? Electrician?" Customer replies "1" — booking confirmed instantly. No phone calls. No searching. Just a network that works.

INSURANCE BROKER

Retention Engine

71% to 94% Retention

340 policy renewal dates monitored automatically

Personalized check-ins 60 days before expiry. No policy falls through the cracks. Retention jumped 23 points with zero additional staff.

INDUSTRIES

Who We Serve

If your team does repetitive work, we can automate part of it.

MOBILE / ON-SITE SERVICES

- HVAC / Plumbing / Roofing
- Cleaning / Landscaping
- Pest Control
- Moving Companies

NEXT STEP

Let's Build Something.

Every engagement starts with a conversation. No pitch. No pressure.
We talk about your business, where you are losing time, and whether AI is the right solution.

- ✓ Your current workflows and pain points
- ✓ Where AI would have the highest impact
- ✓ Timeline and scope for a custom build
- ✓ Expected outcomes and ROI
